Colour Alex in!

This is Alex.

He enjoys going to the park and riding on his scooter.

Alex just had his birthday!

Can you guess how old he is?

Now that Alex is older, the doctors want to know how big he has grown and if he is healthy.

When Alex was a baby in his mummy's tummy, his mummy had special tests and extra scans that took pictures of him inside her tummy.

This helps her doctors to know how he was growing.

The doctors would also like to know about whether Alex has been poorly and how he is getting on at school.
